
0.1 Question 2d

(Written Response) If we were to drop businesses with postal code values equal to `missing_postal_code`, what **specific types of businesses** would we be excluding? In other words, is there a commonality among businesses with missing postal codes? **Please respond in no more than 2 sentences.**

Hint: You may want to identify and Google the names of the businesses with missing postal codes. Feel free to reuse parts of your code from 2c to re-examine `bus_missing` but we will not be grading your code.

I think if we drop business with postal code values that equal to `missing_postal_code`, it would be excluding Small shops and restaurants that share the same huge building like shopping center and street food restaurants. These may include food trucks, vendors, those does not have exact address and building.
